Common Algebra Mistakes
Fragment: Solving a Linear Equation

The Mistake Fragment

Find the algebra mistake:

$$180k = 2 \implies k = 90$$

Need a hint? Look carefully at the red part of the algebra:

$$180k = 2 \implies k = \textcolor{red}{90}$$

The Correction

$$180k = 2 \implies k = \textcolor{blue}{\frac{1}{90}}$$

An Explanation

The correct step is to divide both sides by *180*.
